

## Simple Compass Heading Algorithm (for easier steering)

input	output
0	0
10	10
20	20
30	30
350	-10
340	-20
330	-30
320	-40

```
if (input > 180) {  
    output = input - 360;  
} else {  
    output = input;  
}
```
